SOLUTIONS FOR YOU

Financial and Tax Due Diligence

Financial and tax due diligence involves analysing and validating all the financial, taxation, commercial, operational and strategic assumptions that are being made. It is an important aspect of transaction planning as it can affect the purchase price for a business or even the decision whether to proceed. By looking at the past, it is possible to form a view about the future and identify whether there are any “skeletons in the cupboard”. Our due diligence approach is to identify all critical factors and areas for which an informed decision can then be made. We look at both current performance and its future prospects including revenue, sustainable earnings, future cash flows and all taxation and operational issues as well as the overall deal structure.

From a vendors' perspective, when a business is up for sale, or when an organisation is disposing of a non-core segment, an in-depth report on its financial health needs to be presented to prospective buyers.
